DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims **1-14** and **21-23** are drawn to a data storage device, classified in class **365**, subclass **171**.
 - II. Claims **15-20** and **24-26** are drawn to a method for forming a data storage device, classified in class **438**, subclass **3**.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the data storage device of claims **1-14** and **21-23** can be made by another and materially different process such as a process that not require the use of a first plane, a semiconductor layer, a metal layer instead, etc.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter and also different classifications requiring further searches, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
